

1.2 Empathy Map Canvas

Persona: A ServiceNow administrator responsible for protecting branch-specific student records.

Quadrant	Details
Says	"Only EEE users should see EEE records."
Thinks	Role-based access is too broad; a record-level rule is needed.
Does	Creates groups, assigns roles, and tests access using impersonation.
Feels	Worried about data leakage; confident once a script-based rule is enforced.

Pains and Gains

Pains	Gains
Unauthorised users can view restricted records; manual monitoring is required.	Automatic record-level protection; less administrative effort; clear audit of access rules.
