

3.2 Proposed Solution

S.No.	Parameter	Description
1	Problem statement	Unauthorised viewing of branch-specific records
2	Idea / solution	Script-controlled ACL using the record's Branch value and the user's group
3	Novelty	Combines a field value with group membership in a single script
4	Social impact	Improves data privacy and trust
5	Business value	Reduces manual access management effort
6	Scalability	The same script can be extended to other branches and tables
